

Information Assurance Specialist
Requisition Number: P50-OP-08

CORDEV, Inc. is looking for an IA specialist to work with the United States Army at Ft. Campbell, Kentucky. The successful candidate will be a hands-on professional that will provide assistance to the Information Assurance Inspection Program, and provide coordination and technical support in the SIPRNET/NIPRNET accreditation process. You will review applications and scans, and provide maintenance of information assurance policies and procedures. You will assist in enhancing overall network defense in depth, including mandated Department of Defense requirements and local initiatives at the direction of the Government and the CORDEV site manager. You will also participate in planning and support of security engineers in new projects, and execute Information Assurance requirements taking into account IA configuration implementation strategies that consider the operational environment, mission, criticality, and application requirements. You will exercise sound judgment in recommending deviation from standard practices using approved DoD mitigation methods for enhancing security of information systems through modification and application of evolving technology. Qualified candidates should be able to use report writing software associated with government and commercial software, and have working knowledge of Microsoft systems, DoD Computer Network Defense software packages (Retina, Blue Coat, QTIP, WIDS, McAfee 2600, and Arcsight Appliances). You will also be responsible for Compliance of Applications, Software, and Scanning using Hercules software. You will report to the Government IA lead and the CORDEV site manager. Please forward resume and salary requirements to Kate Sullivan, (kate.sullivan@cordev.net) with the requisition number in the subject line of your email.
