

CORDEV, Inc. is a privately held, small business with headquarters in Falls Church, VA providing Information Technology and Telecommunications support services to the U.S. Government. Shortly after it's founding in 1990, CORDEV established its reputation as a "can-do" service provider that consistently receives high customer praise.

The unifying principles underlying CORDEV services have always been: Personal integrity at all levels; Commitment to excellence and; Consistent delivery of services that exceed customer expectations.

CORDEV has developed a highly skilled and effective organization, staffed to provide high quality Information Technology and Telecommunications support services at diverse military locations. CORDEV Engineers, Technicians, and Customer Service people form the backbone of our ability to support clients, providing state-of-the art services in telecommunication facility management, system and network design, and the installation, integration, testing, certification, and maintenance of installed systems.

Our performance record is exemplary and since inception CORDEV has successfully performed on 33 competitively awarded, multi-year, prime contracts representing more than 200 years of providing Information Technology and Telecommunication support services. With over 170 employees currently deployed at ten sites in the continental United States providing Telecommunications and Information Technology support services to Department of Defense customers, CORDEV is continuing its history of providing quality telecommunications to its customers.

CORDEV understands that the success of all it's contracts is highly dependent upon the effectiveness of it's Program and Technical Support Site Teams; the resources the Teams apply to meet the contract objectives; and the visibility and oversight provided to the Teams at the corporate level. Consequently, CORDEV's internal organizational structure has been designed to best enable Program and Technical Site Teams to be responsive to our customers.

CORDEV in accomplishing its many Information Technology and Telecommunication projects nationwide employs proven technology combined with an organizational structure possessing in-depth technical and managerial skills. CORDEV has enjoyed dynamic success with its customer-focused approach in meeting our client's requirements. We believe that this approach has molded our organization into a highly effective and dedicated team.

CORDEV has recently developed and is implementing an ISO 9001:2000 compliant Quality Assurance program to provide customers with a maximum degree of confidence that CORDEV provided services are performed in accordance with applicable standards and that appropriate measures are being taken to insure trouble-free operation.
