
CAPABILITY STATEMENT | FOR TEAMING PARTNERS

Defense installation IT and telecommunications contractor that stays after the transition.

Enterprise services across 40+ military installations since 1988.

WHO WE ARE

CORDEV is a small-business prime with 38 years of Army installation IT and telecommunications past performance. Primes team with CORDEV to add installation-IT depth and a retention record to the bid. On the IMCS program, CORDEV has retained every task order it has won at least once at recompetete.

WHAT WE BRING TO A TEAM

CORDEV is looking for two kinds of primes: those whose customer base would expand our profile beyond Army installations, and those whose specialized technical scope (AI, data engineering and analytics platforms, advanced cyber, other modernization work) calls for the installation IT and telecommunications sustainment CORDEV already delivers. CORDEV brings a cleared, Army-seasoned workforce and scope depth; the prime brings the customer relationship or specialized technical capability CORDEV does not build in-house at scale. Neither side is supplying what the other already has.

Clearance & Compliance

- Top Secret Facility Clearance, active
- 100% of workforce holds Secret or above
- CMMC Level 2 (self-certified)
- ISO 9001:2015 certification issuing 6/26
- DoD 8140.03 compliant workforce (Security+, CISSP)
- ISO 9001 Internal Auditor & ITIL 4 certified staff
- BICSI TE350 certified staff
- P25 certified technicians

Rapid Workforce Surge

At Aberdeen Proving Ground, CORDEV onboarded 51 cleared full-time equivalents in five business days and fielded vehicles, tools, and TMDE within 10 business days, from Friday award through Monday start.

Capability Depth

IT: Tiers I – III help desk, network and systems administration, asset lifecycle, patch and vulnerability management, account provisioning, VTC support.

Telecommunications: unified communications including Avaya call servers, VoIP infrastructure, DSN trunking, and endpoint administration; inside and outside plant O&M and infrastructure; Land Mobile Radio including tower infrastructure, master controller, subscriber units, and network management.

PROOF

Fort Campbell, KY (2008 – 2019). Unified ATS and IT services across two task orders plus a bridge period; 60+ FTEs; \$66 M combined; 30,000+ users. CPARS Consistently Excellent in Quality, Schedule, Cost Control, and Management; Outstanding COR reports; retained 84% of incumbent workforce across the full period of performance over two task orders.

↳ Which means the team responding to the 0200 network outage already knows the topology, the equipment, and the workarounds.

Fort Benning, GA (2011 – 2020). Two consecutive task orders; 35+ FTEs; \$45 M combined; 43,000+ users. Benning ran outside plant and inside plant on separate contracts, with predictable disputes, before CORDEV consolidated both and closed the gap. Retained the work through the recompet boundary between the two task orders.

↳ Which means a prime bringing CORDEV into a consolidated scope is bringing a contractor that has already run the consolidation playbook, not one improvising it.

Fort Bliss, TX (2015 – 2021). Six-year continuous performance; 50+ FTEs; \$40 M combined; 40,000+ users. CORDEV operated enterprise IT at the cantonment and Land Mobile Radio O&M at White Sands under the same contract and the same leadership, as a single integrated service covering tower infrastructure, master controller, subscriber units, and network management.

↳ Which means the LMR network was operated as mission-critical range communications where an outage halts live operations.

INSTALLATION FOOTPRINT: Aberdeen Proving Ground, MD; Carlisle Barracks, PA; Fort Jackson, SC; Fort Rucker, AL; and Redstone Arsenal, AL; among 40+ Army sites; on **145+ prime contracts and task orders** across pre-IMCS DOIM awards, IMCS I through IV, and adjacent standalone Army work.

CORPORATE DATA

Legal Name: CORDEV Corporation | **DBA:** CORDEV, Inc. | **Incorporated:** 1988 | **HQ:** Clarksville, TN
UEI: JUHQH72K3MJ6 | **CAGE:** 0P023 | **Size:** Small Business (primary); WOSB certification in progress

Contract Vehicles

IMCS IV – W91RUS-23-D-0016. \$900 M Army IDIQ for information management and communications services across Army installations. Ordering period through June 17, 2033.

GSA MAS – 47QTCA22D007Z. PoP through May 4, 2027. SIN 54151 Software Maintenance | SIN 54151S IT Professional Services | SIN 811212 Maintenance of Equipment.

NAICS

541519 (primary); 517111, 517112, 517911, 517919, 518210, 541330, 541511, 541512, 541513, 541611, 541618, 541690, 561210, 561621, 811213

OEM Partnerships

Avaya, L3Harris, and Motorola.
